# Quick, Simple & Affordable ATP Water Test

## AQUASNAP™

### ATP Water Testing Device

Product #AQ100 (100 tests per case)

Aquasnap is a user-friendly, self-contained ATP water testing device used in conjunction with Hygiena luminometers. This pen-sized testing device is easy to use, economical and gives real time results. The honeycomb-shaped dipper collects 100 µl of water ensuring consistent sample collection. Aquasnap uses a liquid-stable reagent in place of the freeze-dried enzymes giving it superior reproducibility and sensitivity. This provides better accuracy, longer-lasting signal strength and more consistent results.

### Product Specifications

- 12-month shelf life at refrigerated temperature
- 4-week shelf life at room temperature
- Dropper bottle with ATP extractant
- Collects 100 µl of sample

### Intended For

- CIP Systems
- Water Quality Assessment
- Paper Manufacturing
- Bioburden Testing

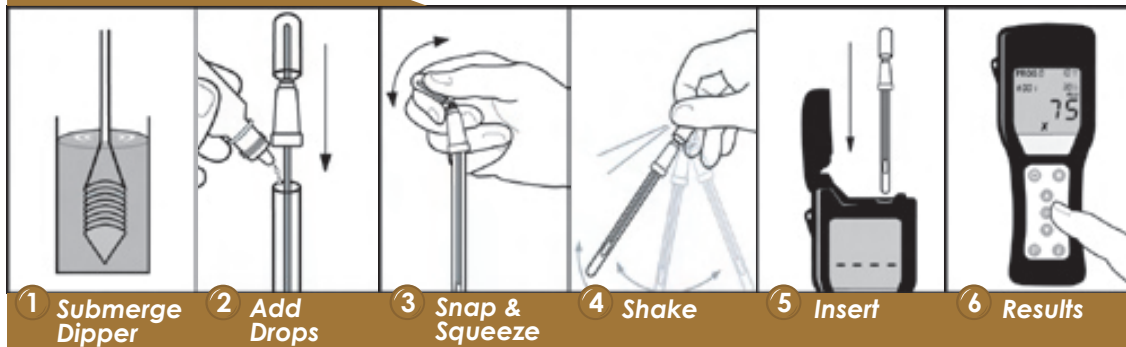

### User Benefits

- Results in seconds
- Simple, quick and user-friendly
- Unprecedented accuracy and reproducibility
- Tolerant to temperature abuse
- Costs up to 50% less than other ATP water tests

### Instruments

- SystemSURE II
- Pi-102

### Results in Seconds
